

Brintons

Name: Hyatt Regency Denver Tech Center
Details: Axminster: 3,000 SY
Date: 2014

Brintons in collaboration with Studio 11 Design, designed 3,000 square yards of custom axminster carpets for Hyatt Regency Denver Tech Center.

"Studio 11 Design worked with Brintons on several new carpet concepts, in which we drew inspiration from the idea of technology in order to convey that the carpet pattern matched the energy level that the hotel currently boasts. The colors were derived from Hyatt's existing color scheme, as well as from the natural landscape of Colorado. Lighting was kept modern and updated to reflect the mood of the furnishings in the lobby. We were all pleasantly pleased on the final installation."
